

invisalign[®] *Patient Cooperation Agreement*

Our team is dedicated to providing exceptional patient care. To ensure that your Invisalign treatment progresses on schedule and as smoothly as possible, it is imperative that you understand the procedures that are involved in your treatment.

Aligners must be worn 22 hours a day, except when eating, drinking, brushing, or flossing. Invisalign only works while you are wearing your Aligners.

Tooth-colored or clear attachments or buttons may be attached to your teeth or to the Aligners. These buttons and/or attachments are nearly invisible and will aid the Aligners in moving your teeth properly.

It is critical that you follow instructions on wearing Aligners (inserting and removing), cleaning Aligners, and proper brushing and flossing covered in the 'Use and Care Instructions' pamphlet included in the patient starter kit.

Always store your Aligners in their case when not being worn to avoid loss or risk of damage. Replacement aligners will be an additional fee.

Aligners are designed to sequentially move your teeth, it is very important to wear each Aligner in the order prescribed. Usually, you will wear each Aligner for one week. Do not wear Aligners out of order. Do not skip Aligners.

Keep your scheduled appointments, this is the only way we can be sure that your treatment is progressing as planned.

Additional Aligners and/or auxiliary appliances may be needed at the end of your treatment in order to completely finish your treatment.

Retainers after treatment is complete are designed to maintain the smile you've invested in.

Please don't hesitate to call our office if you should have any questions or problems with your Aligners. I have read and understand these tips to my successful Invisalign[®] treatment.
